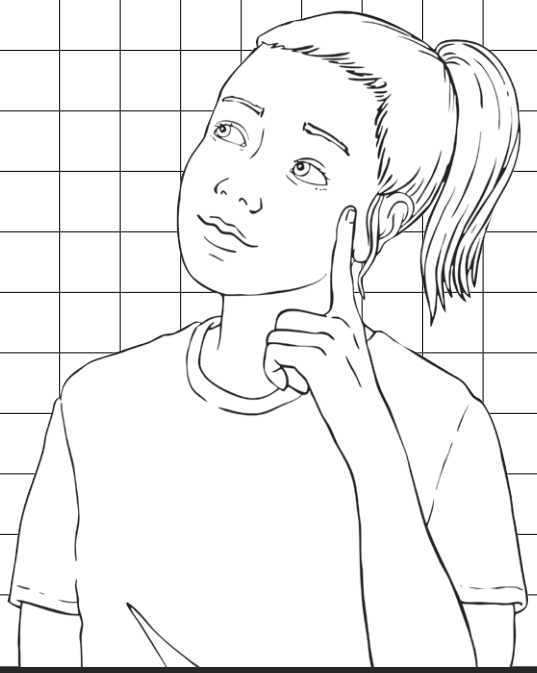
Order of Operations - Independent

I can solve reasoning questions involving the order of operations.

What totals can you make by calculating with four 5s?

You can use any combination of the four operations, +, -, ×, ÷, orders (^{2}, ^{3}) and brackets to help you e.g. 5 × 5 + (5 ÷ 5) = 26


You must use all 4 fives each time and use the correct place value (e.g. you cannot place 3 fives together to make 555).
